

DISCUS DMC.WebSafe Portal

Efficient distribution of DICOM data with DISCUS DMC.WebSafe

Secure and simple exchange of examination data

Imagine being able to upload patients' examination data directly from any PACS workstation or modality, encrypted and in compliance with the highest security standards, to a secured web server. Referring institutions can automatically transfer this data into their own PACS, regardless of their PACS, RIS, or HIS system. All referring physicians, as well as treating doctors and hospitals, receive a free PACS import module for fully automated reception and import of examination images.

The solution: DISCUS DICOM Media Center

The DISCUS DICOM Media Center with DMC.WebSafe enables efficient and secure exchange of examination data via a DMC.WebSafe server and QR code access credentials to the web portal. It offers numerous advantages:

- Included Services: Upload flat rate, setup, installation, training, service, and support.
- Highest Security: Cryptographically encrypted digital containers per patient/examination.
- User-Friendliness: Easy to handle and efficient.
- PACS Neutral: Usable regardless of your PACS, RIS, or HIS system.
- Cost-Effective: Affordable* and can be canceled at any time**.
- ePA: Transitional solution until the implementation of a DICOM-compatible electronic patient record.
- Independence: Functions independently of existing PACS and RIS/HIS systems.
- Automated Process: Minimizes workload through fully automated processes.
- DMC.WebSafe: A dedicated server for each institution in a German data center.
- Advantage for Your Referrers: One-click download, automated if desired.
- Transfer: From the PACS or directly from the modalities.
- Upgrades: Data storage in DMC.WebSafe with 6, 12, and 24 TB.

Many hospitals struggle with data import through existing portals. DMC.WebSafe addresses this issue with an intuitive platform that minimizes complexity and enhances compatibility. This saves time, reduces errors, and significantly increases efficiency and user satisfaction.
